# \_HONEY PROCESS

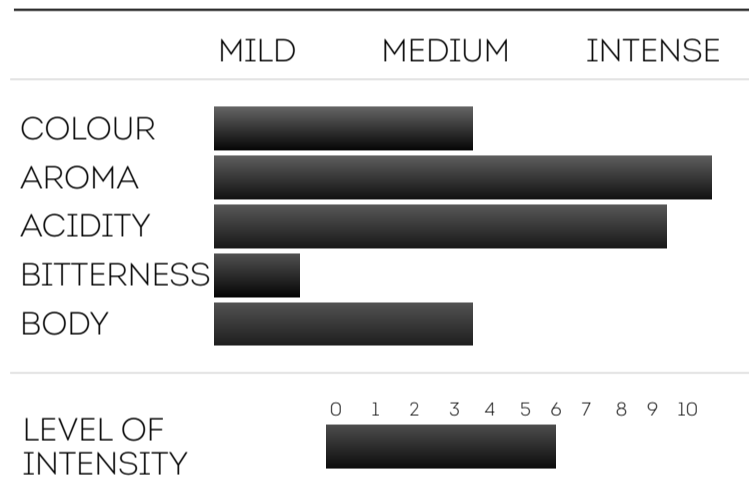

## *Sweet & Fruity*

Our Honey process coffee has a great sweetness with a ripe fruit aroma and balanced acidity with a milk chocolate aftertaste.

The key to this process is its meticulous elaboration. The ripest cherries are harvested from the trees and when the coffee beans are pulped, the mucilage, the layer that surrounds each of the seeds, is left behind. This drying process, even with the mucilage covering the bean, has a direct impact on the sweetness in the cup, providing a unique flavor.
